Farm Topics

Cube Turkey Steaks To Aid Consumption

Process Boosts Market For Large Type Fowl

By W. J. DRYDEN

Turkey raisers want to produce the larger holiday bird—the public wants the smaller fowl. The cost for a large tom is too much for the average family. To produce a small turkey the cost per pound of gain is far greater than in the case of the larger fowl.

Desiring to create a year around consumer demand for turkeys, the National Turkey federation and the Poultry and Egg National board de-

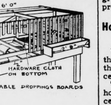
Making turkey steaks with cube machine.

cided to utilize the machine which for years has been turning out the beef cubed steak.

The meat is removed from the turkey and sent through the machine and out comes a four or six ounce steak, ready for the stove and then the lunch box or the formal dinner.

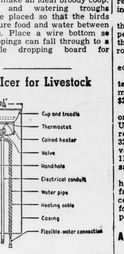
Consumption of turkeys has been less than five pounds per capita. With development of the turkey steak, the turkey industry is endeavoring to attain a per capita output 10 times higher. The cubed turkey steak can be quick frozen and packaged in the same manner as many other kinds of steaks. This new plan is expected to assure the turkey raiser that there will be no overproduction of turkeys.

Fattening Crate



It may be advisable to confine poultry in small pens for market feeding. This fattening crate is easily made by the poultry raiser and also will make an ideal broody coop. Feeding and watering troughs should be placed so that the birds may secure food and water between the slats. Place a wire bottom so that drippings can fall through to a removable dropping board for cleaning.

De-Icer for Livestock



A barnyard drinking cup in an open area where stock have access to it from all sides has been developed recently. The cup rests on a heavy steel cylinder installed in the earth to protect the water supply pipe, electric heating unit for the cup, heating cable for the pipe, and thermostatic switch. —Drawing by Geneva Agricultural Experiment station.

Cannibalism Termed Frequent in Winter

Cannibalism may be started in the laying house during the winter months due to confinement of birds formerly adjusted to ranges, to lack of proper air, improper housing, floor laying, injured birds left in house, blow-outs and insufficient and improperly constructed nests as well as idleness, crowding and inadequate eating and drinking space. The remedy will lie in removal of the offenders.

Radar Can Spot Moving Targets

Army Develops a New Type Which Can Pick Out Objects on Ground.

PHILADELPHIA—A new type of radar which can pick out a moving object—a tank, a truck or even a man—against its background, something which no radar in use during the war was capable of doing, has been developed by the army, it was disclosed here.

The present equipment, weighing many tons, is not a mobile field unit, but development which will reduce the present cumbersome equipment to easily handled field size is in progress, it was intimated.

The new type radar is known as "moving target indication," it was revealed by Capt. Jack M. Clark, radar authority of the Second army, who addressed a group of reserve officers and veterans in a military orientation talk.

Adapted to CPS.

At the present time, the moving target indication has been adapted only to the very heavy radar installation known as CPS-6, postwar model of the highly sensitive device which was used to pick up the V-1 "buzz bombs" deluging London during the war. It was used primarily to direct royal air force fighters which intercepted the relatively slow V-1s.

The CPS, weighing many tons, cannot be moved about in accordance with tactical situations such as small unit sections would meet, where detection of a squad of men, one or two tanks or a small convoy would be of great military advantage.

Effect on Tactics.

However, Captain Clark said that if the "moving position indication" kit which is now attachable to the CPS-6 had been available in the Ardennes, it undoubtedly would have picked up the concentration of the German armored forces which effected the breakthrough in the Battle of the Bulge.

A moving position indication radar would nullify such tactics as night infiltration, which the Japanese used to such advantage in many campaigns in the Pacific, as well as the organizing of heavy troop concentrations under cover of darkness.

Although, as pointed out, such applications must await development of equipment now in a relatively crude form, all of the fundamental technology and equipment is in hand. When final development is achieved, it is expected to cause some drastic revision of standard ground forces' tactics and supply procedures.

Home Buying Trend Noted; 55 Per Cent Owner Occupied

WASHINGTON — More than half the nation's dwellings are owned by the people who live in them, the census bureau reported.

The percentage of owner occupied homes is 55, compared with 44 per cent before the war in 1940. In rural areas, 68 per cent of the dwelling units are owner occupied, but in urban areas only 48 per cent are.

The bureau survey, made in April, brought out that the nation's 41,709,000 dwelling units — ranging from rented single rooms to mansions—in general are:

1. Less overcrowded than before the war, in the sense that only 6 per cent have an average of more than one and one-half persons per room. In 1940, 9 percent did so.

2. In better repair and better equipped.

3. The median rent (half of the tenant occupied units rented for more, half for less), is higher — $29.33, against $21.46 in 1940.

The bureau said that only about one house out of every 100 in the United States was for sale or for rent. The survey showed that about 327,000 or .8 per cent, of livable vacant units were for rent. About 112,000, or .3 per cent, were for sale.

City dwellers, the survey showed, had less chance to rent a home than farmers. In cities, only about .4 per cent of the livable vacant units were for rent. In farm areas, about 2.1 per cent were for rent.

Archaeologists to Resume Treasure Hunts Into Asia

CHICAGO. — Bits of ancient pottery that may tell of man's first attempts to tame animals and plants for his own use will be the object of a University of Chicago treasure hunt in Iraq.

That project and one in Iran will be the first American digging expeditions in western Asia since the war.

Two archaeologists and their wives will conduct research for the university's Oriental institute.

Robert J. Braidwood hopes to find remnants of villages dating back to 4000 B. C., and maybe 6000 B. C.

He and his wife, also an archaeologist, will direct 50 local workmen in digging a mound near Qara Yitagh. The Braidwoods and their two children will live in a tent until next spring, when they will return here.

Donald E. McCown and his wife will ride a jeep through the area at the head of the Persian gulf, looking out for likely mounds.

Bethany

Bethany, Dec. 30.- Mr. and Mrs. Glenn Elliott, of Danville, spent last week with Mr. and Mrs. Phil Paulette.

The dinner guests of Mr. and Mrs. Jeff Paulett recently were Mr. and Mrs. Bruc Paulette and son, and Mrs. Ashby Paulette and the Rev. Cecil G. Carter.

Those visiting in the same home Sunday afternoon were Misses Rodi and Hazel Paulette, Doris Franklin, George Franklin and Mr. and Mrs. Jack Paulette.

Mr. and Mrs. Jimmy Harvey, of Lynchburg; Mr. and Mrs. Henry Harvey, of Richmond, and Mr. and Mrs. Herbert Deadmon and children, of Petersburg, visited Mr. and Mrs. Larkin Harvey over the Christmas holiday.

Those spending Christmas day with Mr. and Mrs. Phil Paulette were Mr. and Mrs. S. J. Paulette and children, of Halifax; Mrs. Edward Moore, of Madisonville, and Mr. and Mrs. Randolph Evans, and children, of Evergreen.

Those visiting Mr. and Mrs. Curtis Paulette and Mrs. Katie Allen on Christmas Day were Mr. and Mrs. Ellis Allen, of Alexandria, Va., Mr. and Mrs. Meade Crews and sons, of Nathalie, Mr. and Mrs. Hugh Cabiness and daughters, of Brookneal; Mr. and Mrs. Jimmie Harvey, of Lynchburg, and Miss Martha Harvey of Appomattox.

Misses Ora and Phyllis Paulette, Emmitt Paulette, Mr. and Mrs. Glenn Elliott, Miss Roberta Coleman, and Walker Beale visited Mr. and Mrs. Sam Joe Paulette, of Halifax Sunday afternoon.

Mrs. Ruth Jennings and Douglas Jennings visited Mrs. Mildred Clark Sunday morning in the home of Mrs. Larkin Harvey.

Edwin and Ivy Paulette, of Richmond spent Christmas with their mother, Mrs. Vilson Paulette.

Mr. and Mrs. Curtis Paulette and daughter, Mrs. Katie Allen and Otis Allen spent today with Mr. and Mrs. Meade Crews, of Nathalie.

Mr. and Mrs. Jack Paulette have returned from a visit to Georgia.

Miss Virgie Paulette, of Richmond was home for Christmas.

Mr. and Mrs. Curtis Paulette and daughter, Mrs. Katie Allen and Otis Allen were supper guests of Mr. and Mrs. Hugh Cabiness, of Brookneal, Saturday night.

Mr. and Mrs. Bill Dudley, Miss Thalia Harvey, Mr. and Mrs. Wylie Richardson and sons, of Lynchburg, visited Mr. and Mrs. Mott Harvey over the holidays.

Mrs. Wilbe Paulette and Gene Paulette visited Mr. and Mrs. Phil Paulette Sunday afternoon. Mr. and Mrs. H. D. Asher visited in the same home Saturday evening.

Mr. and Mrs. David Paulette and daughter visited her parents, Mr. and Mrs. J. L. Morris, of Madisonville Christmas day.

Mrs. Frecs Asher, of Lynchburg spent the week-end with Mr. and Mrs. Curtis Paulette.

Science Dispels Leprosy Taboos

Effort Is Launched to Erase Fallacies Prevailing For Centuries.

CARVILLE, LA. — In an effort to dispel the fallacies, misconceptions and superstitions which have surrounded the disease for 6,000 years, an educational campaign is being launched to acquaint the public with the true facts regarding leprosy. Spearheading the campaign are officials of the U. S. Marine hospital, the government-operated national leprosarium here.

Among the initial steps in divorcing leprosy from its ancient background, medieval superstition, and present lack of knowledge on the part of the public is an attempt to foster use of the name Hansen's disease, which is preferred by leprosy victims. The name is derived from G. Aramuer Hansen, Norwegian physician who in 1874 discovered the germ which causes the disease.

The age-old dread usually engendered by the name leprosy usually can be traced to the Bible and the 13th chapter of Leviticus. The leprosy of the Bible, it is pointed out, was a generic term encompassing seven or eight cutaneous diseases. Research has demonstrated that leprosy was brought to Rome by Pompey's legions returning from the campaign in Egypt in the middle of the last century B. C., indicating that the disease described in the Old Testament could not have been leprosy or it would have spread through Asia Minor and Greece and thence to Rome many centuries earlier.

Old Fallacies Debunked.

Modern science has proven that Hansen's disease is the least communicable of all communicable diseases, even under conditions of prolonged and intimate contact. Since isolation of the bacillus by Hansen, hundreds of attempts have been made to grow it in artificial media but none has been successful. Attempted inoculations of animals also have proven unsuccessful. In more than 145 recorded cases, no scientist has been able to infect himself or other human volunteers by attempted inoculation of the germ.

Far from being the filth disease, the "unclean" disease, the affliction or curse of God which it has been pictured for centuries, Hansen's disease is merely a germ disease, of the same tuberculosis. Moreover, Hansen's disease is less communicable than tuberculosis, and whereas tuberculosis is hereditary, Hansen's disease is not.

The method of transmission is still the stumbling block in effecting final control. Researchers are checking the numerous theories regarding the mode of transmission, ranging through soil composition, mosquitoes, roaches and almost all pests affected by DDT.

Estimate of Cases.

Estimates of the number of cases of Hansen's disease in the United States range from 1,200 to 3,000. The average number of cases under treatment annually at the national leprosarium here since 1921 is 324. Other victims are being treated by private physicians, one dermatologist in Texas having about 100 cases. The Carville leprosarium, a modern institution, now has about 380 patients. Thirty-four patients were discharged as arrested cases in 1946.

Sensational results in the curing of Hansen's disease have been noted since 1941, when treatment with the sulfone drugs was commenced at the leprosarium. Promin, diasone and later promizole have proven effective in arresting the disease.

"The stigma is worse than the disease," Carville officials insist, adding that "the real tragedy is that it is not generally known that Hansen's disease is only a mildly communicable disease, is not inherited, tends to cure itself spontaneously under favorable conditions and can be prevented easily."

PROGRESS ON EVERY FRONT

★ The advance of medicine against the enemy, disease, sweeps forward on every front. Techniques of anesthesia have improved to make possible surgical procedures denied to the practitioner of the twenties. Highly refined and specialized mechanical aids, including the x-ray, fluoroscope, and electrocardiograph, have sharpened diagnostic skills. Testing of the blood and urine reveals more significant facts to the physician than ever before.

In support of the physician, the pharmaceutical chemist continues to forge new chemical and biological weapons to fight disease. Insulin for the management of diabetes mellitus, liver extract for pernicious anemia, sulfa drugs, and penicillin are examples. Your physician and your pharmacist are alert to apply the improved procedures as they become available.

Where would you look for a lonely farm?

City folks used to think farm life was a lonely life.

Today, automobiles, telephones, and—above all—*electricity* have nearly ended loneliness on the farm.

Electricity turns dark into day, pumps water, milks cows, grinds feed—does dozens of other chores—brings entertainment and market reports.

Who brought electricity to farms?

The *business*-managed, self-supporting electric companies began the job some 60 years ago. They did the pioneering . . . developed new methods and equipment . . . learned to meet the problems of weather and distance . . . and continued to bring better and cheaper electric service to more and more farms.

In 1936, the Rural Electrification Administration was born. With rural co-operatives, it joined in the job.

Today, electric power is available to more than three-quarters of U. S. farms— and some 5,335,700 are using it. The majority of those farms are being served by the *business*-managed, tax-paying electric companies.

We are proud of the job that has been done. But it will not be finished until low-cost, dependable electricity reaches all unserved areas. This big job is well under way . . . an important part of the $5,000,000,000 expansion program of the *business*-managed electric companies.

Demonstration Clubs Meet Next Week

Home Demonstration Agent's Schedule Week of January 12 - 17:

Monday, January 12.- The Bethany Home Demonstration Club will meet at the home of Mrs. Joe Paulette at 1:30 P. M. Demonstration will be on oven meals.

Tuesday, January 13.- The Oakville 4-H Club will meet at 9:15 A. M., at the school.

The Vera 4-H Club will meet at 10:45 A. M. at the school.

The Appomattox Junior 4-H Club will meet at 1:40 P. M. at the High School Cafeteria.

Thursday, January 15.- The Liberty Chapel Home Demonstration Club will meet at 1:30 P. M., at the home of Mrs. P. A. Thornhill. Demonstration on over meals.

Friday, January 16.- The Oakville Home Demonstration Club will meet at 1:30 P. M. at the home of Mrs. Clarence Moore. Demonstration on oven meals.

Income Tax Information

Many inquiries are being received at the Lynchburg offe ice of the Collector of Internal Revenue as to the filing of federal income tax returns on January 15th.

The only filing that is required on or before January 15 is in the case of farmers and taxpayers whose estimated returns for 1947 are as much as twenty per cent underestimated.

Farmers, unlike other taxpayers, are not required to file an estimated return or their final return on January 15th.

Also required to file on January 15th are taxpayers who have previously filed an estimate but who are as much as twenty per cent underestimated. Failure to avoid penalty may be effected by filing an amended estimate or the final return by January 15th.

Any taxpayer who wishes assistance may secure it at the office in the Post Office Building, in Lynchburg, rooms 306-308, on Monday through Friday, 9 A.M. to 5 P. M.

Spout Spring

Spout Spring, Jan. 5.- Miss Annie Montague, a patient at Lynchburg General Hospital, is better.

Miss Betty Joyce Gowin, of Appomatox, spent Monday night with Miss Betty Layne.

Mrs. Vernelle Dean, who has been ill, is better.

Emmett and Burke Paulette, of Evergreen and Miss Pauline Layne were supper guests Sunday night in the home of Miss Doris Franklin.

Mr. and Mrs. D. J. Franklin and family were guests Sunday in the home of Mr. and Mrs. Oscar Jamerson.

The Hazel Moon Y. W. A.'s will meet Thursday night with Mrs. Vernelle Dean.

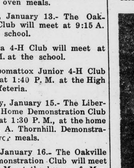
Miss Florence Layne spent the week-end at her home here.

Immediate tax reductions for all citizens urged by Truman in message to Congress.

Start This Month Rebuilding McLean House

Spirited Congressional Contest In Fourth

MANAGES CAMPAIGN



CHARLES F. P. CRAWLEY

Charles F. P. Crawley, Trial Justice of Appomattox County, has been named by Watkins M. Abbitt as manager of his headquarters in his race for election to Congress from the Fourth Congressional District. Mr. Crawley assumed his duties this week. One of his first acts was to issue a "call for volunteers" to help with clerical work at the local campaign headquarters. Those willing to help should call Mr. Crawley.

Charles H. Wilson, of Crewe, the Commonwealth's Attorney of Nottoway County, this week withdrew from the Fourth District Congressional contest. He had previously announced that he would be a candidate.

A political rally for the candidacy of Watkins M. Abbitt for Congress will be held at Buckingham Court House at 8 P.M., Friday night, January 9. A rally for Mr. Abbitt will be held at the court house at Farmville at 8 P. M., Friday, January 16.

C. S. Ranson, of near here says that it may be a good omen that February 17 was set as the date for the Congressional election. February 17 is Mr. Ranson's birthday!

A spirited three-way contest for Congress is under way in the Fourth District to fill the seat held for 27 years by Patrick H. Drewry, Petersburg. Candidates are: Watkins M. Abbitt, of Appomattox; Morton G. Goode, of Dinwiddie, and Robert W. Arnold, of Waverly. Election date is February 17.

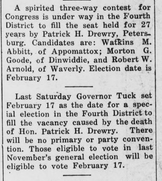
Last Saturday Governor Tuck set February 17 as the date for a special election in the Fourth District to fill the vacancy caused by the death of Hon. Patrick H. Drewry. There will be no primary or party convention. Those eligible to vote in last November's general election will be eligible to vote February 17.

Watkins M. Abbitt was the first of the candidates to formally file his notice of candidacy with the State Board of Elections in Richmond.

Counties and cities in the Fourth District are: Appomattox, Buckingham, Cumberland, Prince Edward, Amelia, Powhatan, Lunenburg, Nottoway, Greensville, Mecklenburg, Brunswick, Prince George, Sussex, Surry, Dinwiddie, and Petersburg and Hopewell.

L. L. Bean, of South Hill, who opposed Mr. Drewry in the primary two years ago, announced this week that he would not be a candidate in the February 17 election.

ROBERT W. ARNOLD



Robert W. Arnold, of Waverly, candidate for Congress from the Fourth District, is Commonwealth's Attorney of Sussex County, Secretary-Treasurer of the Commonwealth's Attorney's Association of Virginia, and Fourth District chairman of the Young Democratic Clubs of Virginia.

Special Meeting Of P.-T. A.

There will be a special meeting of the Appomattox Parent - Teacher Association Monday night, January 12, at 7:30 P. M., in the school library. Supt. J. A. Burke will be present to discuss with the patrons the proposed school improvement plan to be considered by the Board of Supervisors on Wednesday. All patrons are urged to attend.

The regular meeting of the PTA will be held Tuesday, January 20, at the school cafeteria. W. W. Wood of the State Board of Health will be the guest speaker.

Surplus is reported by the Federal treasury.

Truck strikers patrol roads near Boston.

Stassen urges that UNO charter be re-written.

Special Election February 17.

Dr. Pugh To Address Local Lions Club

The Appomattox Lions Club will meet tonight at Mann's Dining Room.

Dr. William Pugh, of Lynchburg will be the guest speaker.

Dealers warned of new oil cut.

French adopt Schuman's new tax measure.

Fight INFANTILE PARALYSIS

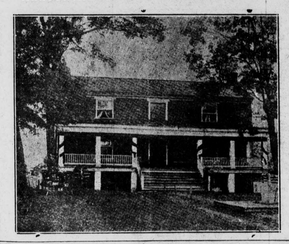
Join the MARCH OF DIMES
THE NATIONAL FOUNDATION FOR INFANTILE PARALYSIS

FAMOUS APPOMATTOX SURRENDER HOUSE



Work is slated to begin during January on the rebuilding of Appomattox's famous McLean House, historic building in which Generals Robert E. Lee and U. S. Grant arranged the surrender here April 9, 1865 which ended the War Between the States.

The National Park Service in Washington has awarded a contract for rebuilding the noted building to C. A. Hancock, of Huntington, W. Va. and E. H. Hancock, of Lynchburg, for $49,858.

The McLean House was torn down in 1893, and efforts for its reconstruction have been under way for several decades.

R. E. O'Brien, of Appomatox, will be job superintendent for the Hancock firm on the project. The contract calls for the job to be completed in 566 days.

The reconstructed building will be furnished in the period of the Civil War.

The McLean House was a two-story red brick structure on a high basement, with a broad veranda in front supported by six columns.

The table on which the surrender papers were signed is now in the Smithsonian Institute, Washington. Most other furnishings will have to be duplicated.

Reconstruction of this key building and other work at the Surrender Grounds was delayed by the recent war, but it is anticipated now that development of the area as a national shrine will proceed as speedily as possible.

High School Chatter . . .

Hi! Well, back to school it is for us after a most joyous and happy holiday season. We hope Santa Claus was good to you. He must have been or you couldn't possibly be so happy just because you are back at school again. A new year has begun and we hope it will bring you much pleasure and will leave behind many happy memories.

What is that saying about a watch being the next thing to an engagement ring? If it is true, Elaine and Garnet had better watch out. Though it seems some of the Senior girls already have engagement rings.

Chicas, have you thought about this being Leap Year? Better take advantage of it. To the boys a warning has already, watch out. I heard that Verta has already taken advantage of it.

We are still wondering about some things, such as why Ruth likes "Bugs," Jean Moore has that starry look (maybe F. J. has something to do with that). Annie Ruth writes with a fountain pen so much; who writes all of this chit-chat! Why Lucy likes Pontiacs so much; what kind of annual we are going to have, and how does one catch "chicken pox"?

Did you know Miss Holley had a fine trip to Wisconsin during the holidays, and Mrs. Morris went to Ohio?

All the Senior boys went to Lynchburg to have their pictures taken for the annual. How they were missed at school! The girls are to go Wednesday.

The dance which Mr. Peters arranged for us to have during Christmas was wonderful. We hope this will be an annual affair.

Well, that's all the news I have room for in this issue, but just keep watching for your name may be in here one of these days.

LT. COMDR. HAROLD STASSEN
Former governor of Minnesota and presidential nominee possibility.

HAROLD STASSEN, candidate for the Republican nomination for President, is scheduled to make an address in Richmond soon.

Writes On Need Of High School Facilities Here

Editor, Times-Virginian:-

We are not complaining about the need of new class rooms for the present school year, however, a gymnasium is very much needed. What we would like to do is present a picture of the future. At present we have 27 class rooms, 14 grade teachers and 15 high school teachers. We have 325 high school students and about 470 grade children. There are 36 that are supposed to graduate this year, 114 in the 8th grade. If we have the same number in the 8th grade the next two years, and indications are that the number will increase, the school year 1948-49 will find an enrollment of approximately 380. There will be no graduating class in 1949, so the enrollment for the school year 1949-50 will be approximately 495.

For the school year 1949-50 with the present number of class rooms available the classes would average about 38 pupils per class, a condition that would be impossible because there would be several classes below the 38 (which would call for additional class rooms). This is due to subjects such as chemistry, Latin, Spanish, Math. and several others not being required, but many students want and must have them in order to enter college. To one sure all the high school graduates will not go to college, but we do not want a high school from which children cannot enter college.

The writer of this article is not arguing for or against the addition to the present buildings, but is just giving you some information so that you can reach a wise decision.

An investment in our youth is the best investment in the future of the world. These children are your children. What do you want them to have?

J. E. Peters,
Principal, A. H. S.

Tax Men At O'Brien's Office

Two representatives from the Internal Revenue Office will be in our office the 14th and 15th of January to assist you in filing your Federal Income Report. Please take advantage of this as it has to be done.

J. H. O'Brien,
Commissioner of Revenue.

Urges Farmers Buy Fertilizer Needs Early

Reports from manufacturers in Virginia indicate that movement of fertilizer this year has dropped to almost that of 1946 and 1945, and R.B. Hudgins, County Agent warned this week that if manufacture of nitrogen solutions is halted because of the slow movement, it will result in an even more acute nitrogen fertilizer shortage next spring.

The agen urged farmers to order their fertilizer and accept delivery now to speed unloading. This is the best insurance against a fertilizer shortage at planting time and fertilizer in the barn will certainly look much better next spring than a copy of an order which may or may not be filled.

There is a relatively large supply of nitrogen solutions available at present, but the "fly in the ointment', says Mr. Hudgins, is that these solutions must be used by the fertilizer manufacturers personally upon receipt by mixing with other materials such as superphosphate and muriate of potash. The storage facilities for mixed fertilizer at the plants are limited and when they are full, shipments of nitrogen solutions must be stopped.

Board To Meet Wednesday

The county board of supervisors will hold its first meeting of the new year next Wednesday. The board will begin preparation of a budget for next fiscal year and has invited citizens to be heard for or against a building program for the public schools of the county.

Town Council Meeting

The Town Council of Appomattox held its monthly meeting on Monday night. Matters pertaining to the use of the fire truck and zoning regulations featured the agenda.

Play safe—drive carefully.
